

# Providing a Blanket of Security

At Radiology Associates, we take your security to heart. Our healthcare team, composed of subspecialized board-certified radiologists, experienced technologists and dedicated support staff, is united in providing diagnostic and interventional services that are accurate, effective and safe, in a caring and personal environment.

It is our mission to protect your health and your trust through every step of your care.

Find out why Radiology Associates is the smart, compassionate choice for your diagnostic and interventional needs.

## Focused on Quality Centered on Care

Providing Personalized Radiology  
Services & Care With Heart

**RADIOLOGY  
ASSOCIATES**

# Over 6 Decades of Trusted Care

For more than 60 years, healthcare practitioners and patients have trusted us for an array of leading-edge diagnostic and interventional services. With imaging centers across 3 counties in eastern Central Florida, Radiology Associates is the smart choice for important reasons:

**A Renowned Reputation For Quality Care**  
Trusted by local physicians

**Utilizing the Most Advanced Technologies & Procedures**

**Accreditation From the American College of Radiology**  
For outstanding technology, practice standards and safety

**A Comfortable, Thoughtful Environment**

**An Expert Team of Subspecialized Board-Certified Radiologists**

**Exceptionally Trained Technologists & Support Staff**

# Revolutionary Services

**MRI** - For deep, clear, best-in-class imaging of organs, bones and joints, all without radiation

**CT Scan** - Provides deep, sophisticated, 3D-quality imaging of organs, bones and structures

**PET/CT** - Delivers the 3D imaging of CT with the functional data of PET in a single scan

**Nuclear Medicine** - Creates images so clear it is able to highlight every major organ system, discovering everything from fractures to tumors

**3D Mammography** - The most advanced breast imaging in the industry, for up to 40% greater accuracy

**Breast Biopsy** - When a suspicious mass is found, biopsy is able to determine if it is benign or cancerous

**Ultrasound** - Gentle, radiation-free ultrasound is used to provide image-guided sample collection and study disease

**Fluoroscopy** - Useful in a wide array of issues, from joint disorders to catheter placement

**X-Ray** - A quick, easy, painless exam to visualize fracture, arthritis and blood vessel issues

**DEXA Bone Density** - A quick, easy test used to discover bone weakness and osteoporosis early in their course

**Echocardiography** - A noninvasive test used to produce live-motion images to examine heart health and function

**Interventional Radiology** - Many diseases can be successfully treated without the risk, pain and recovery of open surgery. Radiology Associates' interventional radiologists are highly experienced in treating problems like fibroid tumors, vascular stenting, stroke management and others.

\* Services vary by location. Contact your local Radiology Associates imaging center to confirm which services are offered.

# Ensuring You're Cared For

We pride ourselves on working with nearly every local insurance provider and offer friendly assistance when you need help filling out forms or have questions about coverage. If you're unsure if your insurer covers our services, just give us a call. We will get to the bottom of it in no time.
